Consulting Engineer
Root cause analysis of incidents involving machinery, mechanical systems, and plumbing systems in residential, commercial, industrial, and maritime applications. Analysis of heating, ventilation, and air condition (HVAC) systems and their associated control systems. Cost estimation of damage to mechanical systems. Consultations including failure analysis, mechanical design analysis, construction evaluation, and damage assessment. Review and preparation of estimates for damaged mechanical equipment. Residential, municipal, and commercial water system investigations. Vehicle investigations. Gearbox investigations. Hydroelectric dam investigations. Residential, commercial, and industrial origin and cause fire investigations, including food processing equipment, heavy equipment, and vehicles.
- June 2008
to September 2016 **Puget Sound Naval Shipyard**
Bremerton, Washington
Senior Shift Test Engineer, Shift Test Engineer, Assistant Shift Test Engineer, Mechanical Engineer
Inspections, repairs, upgrades, and testing of nuclear power plant equipment and support systems onboard U.S. Navy submarine/aircraft carrier platforms. Systems included those used for heat generation, reactor cooling, auxiliary component cooling, pneumatic operation, hydraulic operation, steam, and electrical distribution. Experienced with heat exchangers, pumps, piping, steam turbines, valves, sensors, control systems, power distribution systems, and integrated reactor plant operations. Supervised reactor plant: startups, operation, and shutdowns. Performed hydrostatic testing, equipment operational testing, and reactor plant control certification testing. Led investigations and root cause analysis of electrical and mechanical problems. Trained submarine/aircraft carrier's crew on equipment upgrades, evolutions, and testing. Reactor plant casualty response training. Responsible for the safety of the reactor plant, its crew, the shipyard personnel onboard, and the surrounding local population. Evaluated the use/implementation of equipment operation and maintenance procedures by a submarine's crew. Performed personnel and equipment safety audits that resulted in the prevention of loss.
