

## **EDUCATION**

2016 **Bachelor of Science, Civil Engineering**  
North Carolina State University, Raleigh, North Carolina

## **EXPERIENCE**

August 2022 to Present **Engineering Design & Testing Corp./EDT Engineers, P.C.**  
**Charlotte, North Carolina**

*Consulting Engineer*

Investigate instances of structural damage to building and roof systems and determine cause and severity of damage, experience with concrete slabs, open web steel joists, steel beam, and wood beam/truss supported rooftops.

April 2019 to July 2022 **Network Building + Consulting**  
**Blue Bell, Pennsylvania**

*Project Engineer*

Perform structural analysis and investigations of various local structures including rooftops supported by concrete, steel, and wood beams, wood trusses, brick and CMU walls, billboard structures, brick smokestacks, concrete silos, steel water tanks, telecommunication towers, and concrete foundations. Design and analyze modifications for existing structures that demonstrated insufficient structural capacity per presently enforced codes as outlined by local controlling jurisdictions. Communicate the practiced means and methods with jurisdiction officials to explain engineering standards of structures and work towards a solution that would accommodate all interested parties.

June 2015 to April 2019 **Tower Engineering Professionals, Inc.**  
**Raleigh, North Carolina**

*Structural Staff Engineer*

Research code requirements of existing structures and apply the specified loading to 3D models of structures to determine if structural capacity of the structure in question could sufficiently support the demand. Structures analyzed include rooftops, telecommunications towers, water tanks, and small wind turbines. Researched impact of code changes, including consideration of topographic features, on the resulting wind pressure to determine the change in demand compared to the original design of the structure.

---

## **EXPERIENCE**

### ***Field Experience and Consulting Activity (partial list)***

#### **Rooftop Framing Modification Investigation — *Union City, NJ***

Investigate adequacy of steel beam modifications installed to support existing wood beams supporting the roof.

#### **Duke St. PA — *Lancaster, PA***

Explore structural adequacy of historic district building related to equipment installation.

#### **T-Mobile Stealth Investigation — *Lancaster, PA***

Investigate existing concealed rooftop structures and develop expansion design.

#### **Hotel Equipment Platform Investigation — *Conshohocken, PA***

Investigate existing steel rooftop equipment platform to determine if design intent was met.

#### **West New York 3 — *Guttenberg, NJ***

Destructive rooftop investigation to determine roof structure condition and construction.

## **REGISTRATIONS and CERTIFICATIONS**

Registered Professional Engineer in North Carolina (050468)

National Council of Examiners for Engineers and Surveying Record (#16-292-16)

## **PROFESSIONAL ORGANIZATIONS**

American Society of Civil Engineers (ASCE)

Structural Engineering Institute (SEI)

## **PRESENTATIONS**

*“Topography Determination and Effects”*, presented at the NB+C ES Office, May 2022 in Blue Bell, PA

*“Drift Snow Determination Procedure and Application”*, presented at the NB+C ES Office, April 2022 in Blue Bell, PA

*“Bolted Connection Analysis”*, presented to NB+C ES via Webinar, April 2020 in Raleigh, NC

*“Tower Modifications”*, presented at the NB+C ES Office, October 2019 in Raleigh, NC

---

**CONTINUING EDUCATION**

- 2022     “*SEI Standards Series – ASCE 7-22 Overview & Changes*”, webinar sponsored by ASCE
- “*Network Building and Consulting – Water Tank Analysis Best Standard Practices*”, Online Seminar
- 2021     *EZ-PDH Design of Commercial Buildings to Mitigate Terrorist Attacks*, Online Seminar
- “*Transforming the Rail in Virginia*”, webinar sponsored by ASCE
- EZ-PDH Innovative Building Technology*, Online Seminar
- EZ-PDH Rock Excavations Blasting Design*, Online Seminar
