

EDUCATION

- 2014 **Bachelor of Science, Mechanical Engineering**
Tennessee Tech University, Cookeville, Tennessee
- 2008 **Associates of Science, Heavy Equipment Dealers Service Technology**
South Georgia Technical College, Americus, Georgia

EXPERIENCE

- December 2018 **Engineering Design & Testing Corp.**
to Present **Nashville, Tennessee**
- Consulting Mechanical Engineer*
Engineering expert specializing in large loss, scope of damage, commercial and industrial facilities and manufacturing and processes: root cause analysis, including malfunctions involving machinery, equipment, heavy equipment, mechanical equipment, and systems, plumbing systems. Specialties include silo, tank, press, and bin/container failures including fire/explosion origin and cause, corrosion analysis, ruptures, collapses, and other failure modes. Analysis of heating, ventilation, and air conditioning (HVAC) systems and associated equipment including code analysis. Cost analysis related to equipment, machinery, industrial/commercial repairs, and HVAC/mechanical systems. Fire and explosion origin and cause analysis. Investigation of product defects relating to consumer products, equipment, and machinery, including subrogation.
- June 2018 **Harpeth Park Engineering**
to December 2018 **Franklin, Tennessee**
- Mechanical Consulting Engineer*
Provided consulting services for mechanical, plumbing, and fire protection engineering to residential, commercial, and industrial projects. Mechanical and Plumbing Engineer-of-Record for new construction, renovation, and design-build projects. Provided code-compliant and cost-effective engineered solutions for commercial offices, restaurants, multi-family, assisted living facilities, and retail.
- March 2014 **Gresham Schelton Engineering**
to June 2018 **Franklin, Tennessee**
- Engineer-in-Training*
Provided mechanical and plumbing systems design under supervision of Engineer-of-Record. Conducted building heating and cooling load calculations, assisted with selecting mechanical and plumbing equipment required and generated construction documents.

March 2010
to June 2011

Oak Ridge National Laboratory
Oak Ridge, Tennessee

Mechanical Engineering Intern

Worked under supervision in the Energy and Transportation Science Division's ZEBR Alliance Home Project. Installed and maintained data acquisition, controls, and occupancy simulation for residential research projects. Generate sample reports from collected data.

June 2006
to August 2007

Thompson Machinery Caterpillar
LaVergne, Tennessee

Student in ThinkBig Program

Performed heavy equipment repairs under supervision. Manufacturer-directed program. Conducted field repairs, rebuilt engines, hydraulics, machine shop exposure including welding.

EXPERIENCE

Forensic Engineering Investigations (partial list)

Grain Storage Bin Fire and Collapse – Peoria, Illinois

Investigate to determine the fire origin and cause with large grain storage bin at ethanol processing facility. Investigation included root cause failure analysis, scope evaluation, and coordination with demolition teams, evidence preservation, etc.

Industrial Printing Press – Nicholasville, Kentucky

Investigate industrial printing press fire event. Evaluate scope of damage/value of loss to press equipment and electrical distribution equipment.

Industrial Dust Collector/Baghouse Fire/Explosion – Troy, Michigan

Determine origin and cause of fire/explosion involving dust collector; evaluate scope of damage/repairs to dust collector and various equipment.

Dump Truck Evaluation – Nashville, Tennessee

Evaluate and perform operational testing involving dump truck which was involved in multiple injuries.

Zinc Oxide Facility – Dickson, Tennessee

Evaluate scope of damage and repairs as a result of improper product flow/fire with zinc oxide manufacturing process.

Fire in on-highway Tractor/Trailer – Charleston, Tennessee

Determine origin and cause of fire involving a tractor/trailer. Cause of fire determined to be frictional heating caused by a bearing malfunction within the driver steering wheel hub.

Tornado Damage to 3-Story Conveyor System – Nashville, Tennessee

Determine scope of damage to conveyor equipment damaged by a severe tornado that hit the facility housing the equipment. Oversee construction of temporary structure installed to protect equipment from further damage during building demolition and reconstruction. Evaluate repairs required to restore damaged conveyor equipment to minimize business interruption.

Tornado Damage to 36 Powered Industrial Trucks (Forklifts) – Nashville, Tennessee

Determine scope of damage to forklifts hit by a tornado. Evaluate and conduct operational testing on each forklift. Provide cost analysis of repair/replacement for each forklift.

Aluminum Extrusion Press – Roscoe, Illinois

Evaluate main cylinder barrel fractures and scope of repairs with 4,000-ton extrusion press.

Plastics Injection Molding Press – Parkman, Ohio

Determine cause of malfunction and evaluate scope of repairs/replacement with 750-ton injection molding press; malfunction resulted in damage to equipment.

Tractor Rollover — Cookeville, Tennessee

Evaluate tractor after rollover event which resulted in fatality.

Plastics Extrusion Machine – Annandale, Minnesota

Determine cause of malfunction and evaluate scope of repairs/replacement with single-screw extruder; malfunction resulted in damage to equipment.

Commercial Pollution Control Unit – Nashville, Tennessee

Determine origin and cause of fire involving pollution control unit installed in a restaurant located in a high-rise structure. Cause of fire from improper maintenance checks resulting in electrical fault.

Industrial Conveyor Sander – Southfield, Michigan

Determine origin and cause of fire event involving industrial conveyor sander explosion/fire which resulted in injured personnel. Evaluate scope of damage/value of loss with equipment.

Auto Industry Float Glass System – Nashville, Tennessee

Determine cause of damage to mechanical equipment associated with float glass system. Float glass furnace components damaged from loss of cooling water; loss of cooling water was the result of power interruption to the facility. Determine scope of damage to the furnace equipment.

Commercial Conveyor Oven – Cookeville, Tennessee

Determine cause of explosion that took place within conveyor oven. Cause of explosion was from improper diagnostic and safety procedures on the part of repair contractor.

Case Tractor – Paragould, Arkansas

Determine origin and cause of fire event involving large Case farm tractor.

Flour Storage/Handling Silo System — Lebanon, Tennessee

Determine origin and cause of fire involving dehumidifier. Cause of fire was from improper installation/design with fluidizing process.

Mechanical Ventilation Unit Fire — Spring Hill, Tennessee

Determine root cause of fire in HVAC unit. Cause of fire was from high resistance connection with heater controls.

Soot Damage/Propane Sampling — Gainesboro, Tennessee

Determine cause of soot damage and retrieve LP Propane sample for testing from two residences.

Paper Mill Pulp Tank Collapse — Prattville, Alabama

Determine root cause of pulp storage tank collapse.

CNC Plasma Table Explosion — Memphis, Tennessee

Determine cause of explosion with industrial CNC plasma cutting system.

HVAC Condensate Drainage Evaluation — Charlotte, North Carolina

Evaluate HVAC system and determine failure points of installation. Improper drainage p-trap had been installed resulting in moisture buildup.

Fire Department Breathing Air Tank Filling System — Livingston, Tennessee

Determine cause of malfunction in air compressor used to fill breathing air tanks for fire department.

Multiple Roof-Mounted HVAC Units — Clarksville, Indiana

Determine scope of damage to multiple roof-mounted HVAC units from hail. Obtain and review repair estimates.

Design and Construction (partial list)**Illume Townhomes — Nashville, Tennessee**

Designed mechanical and plumbing systems for a new, 5-story multi-family housing facility.

Little Rey Restaurant — Atlanta, Georgia

Designed mechanical and plumbing systems for restaurant including kitchen hood and grease removal systems.

East Park Office Building — Brentwood, Tennessee

Designed Mechanical Engineer-In-Charge. providing assistance and documentation for 225-ton chilled water retrofit.

608 Main/Austin Peay Dormitory — Clarksville, Tennessee

Mechanical and Plumbing Engineer In Charge for a new 5-story dorm facility on Austin Peay University campus.

Deer Run Camps & Retreats Auditorium — Thompson Station, Tennessee

Provided mechanical and plumbing systems design and documents for a new auditorium facility (occupancy to be approx. 500); challenging aspects of design included commercial kitchen, 1-phase power, and heat pump/electric heat only.

DuraAuto Aluminum Anodizing Plant Addition — Lawrenceburg, Tennessee

Provided mechanical and plumbing systems design for a new anodizing facility addition to an existing industrial complex.

Mechanical Experience with Heavy Machinery (partial list)**Waste Management D8 Dozers — Nashville, Tennessee**

Field repair and replacement of tracks and track shoes on D8 dozer operating in landfill. Additional dozer work included troubleshooting dozer failures after dozer was driven through large quantities of raw fiberglass.

Crawler Loader Engine Removal — Nashville, Tennessee

Removal of diesel engine in CAT 963 crawler loader in the field.

CAT 826 Landfill Compactor — Nashville, Tennessee

Field removal of cab on landfill compactor to diagnose electrical problems.

“Spec-Shop” Repairs — LaVergne, Tennessee

Complete disassembly/reassembly of individual heavy equipment components including CAT 3406 diesel engine, large wheel loader hydraulic cylinders, hydraulic hammers, large wheel/tire assemblies. Assisted with engine dyno testing after rebuilds.

REGISTRATIONS and CERTIFICATIONS

Registered Professional Engineer in Alabama (#50428)
Registered Professional Engineer in Arkansas (#18706)
Registered Professional Engineer in D.C. (#PE40002266)
